### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2816

1. The drawings are objected to because in Fig. 2, the output "A" should be changed to --A OUT-- for consistency with the specification (note that the same change is needed for output "B" as well. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

2. Claims 1 and 10 are objected to because of the following informalities: it is incorrect on lines 10-11 to recite that the reference is compared with the "single-ended input" because the single-ended input is the terminal, not the signal (see line 4 of claim 1). Also in claim 1, on line 12, the recitation that the single-ended signal is "detected" is indefinite for the same reasons noted in the parent case 09/870,623. Note the same problem in claim 10. Appropriate correction is required.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2816

Claims 1-6, 8-14, 16 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Andoh et al.

Note Fig. 1, where the recited pair of differential inputs read on the terminals connected to the gates of FETs 8 and 9; the recited single-ended input is the terminal connected to the gate of FET 11; the recited reference combiner and single-ended comparator are FETs 8, 9 and 11, respectively; the recited first through third controlled current sources are FETs 8, 9 and 11, respectively; the fixed current source recited in claim 5 reads on FET 12; and the recited first resistance reads on diode-connected FET 10.

4. Claims 7, 15 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth B. Wells whose telephone number is (571)272-1757. The examiner can normally be reached on Monday through Friday from 8:30am to 5:00pm.

Art Unit: 2816

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy P. Callahan, can be reached at (571)272-1740. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
